

Our flagship variety!

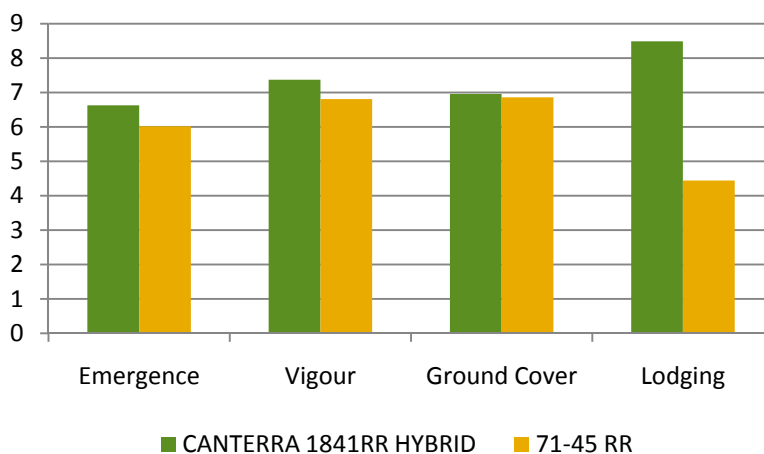

Type	Yield Potential	Maturity	Height	Lodging
RR HYB	8	7	7	9

- Growing Zone: Best suited to the mid- and long-season growing zones.
- Disease Resistance: R to blackleg and fusarium wilt.
- In Field Experience: Great choice for fields with high nitrogen levels (ex. Manured fields).
- Unique Feature: Best standing canola on the market! A high oil variety included in the FARMING FOR OIL™ program.

Trial Results

*Based on 2008 YieldWorks Data
Scale: 9=Excellent, 0=Poor

Key Strengths

- Excellent standability that helps:
 - Increase the ease of swathing.
 - Improve canopy airflow to help battle disease.
- Only a 0.4 bu/ac difference in average yield between CANTERRA 1841RR HYBRID and 71-45RR when comparing 96 demonstration sites from 2006-2008.
